

Amendments to the Claims

This listing of claims will replace all prior listings of claims in the application.

Listing of Claims

1. (Currently Amended) A resin composition, comprising the following components as essential components:

- (A) a polyol;
- (B) a polyisocyanate; and
- (C) a silane coupling agent containing an imidazole group,

wherein the ratio NCO/OH of the number of isocyanate groups in the polyisocyanate (B) to the number of hydroxyl groups in the polyol (A) in said composition is from 0.6 to 4.0 and the weight ratio of {(A) + (B)}:(C) is from 100:0.01 to 100:10 and the silane coupling agent containing an imidazole group (C) is either obtained solely by a reaction of an imidazole compound and 3-glycidoxypolytrimethoxysilane or a reaction of an imidazole compound and 3-methacryloxypropyltrimethoxysilane and has a hydroxyl group in its molecule and when it is obtained by a reaction of an imidazole compound and 3-glycidoxypolytrimethoxysilane and does not have a hydroxyl group in its molecule when it is obtained by a reaction of an imidazole compound and 3-methacryloxypropyltrimethoxysilane.

2. (Original) The resin composition according to Claim 1, wherein the polyol (A) is a polyester polyol, an acrylic polyol, a polyether polyol, or a fluoroethylene-containing polyol.

3. (Previously Presented) The resin composition according to Claim 1, wherein the polyisocyanate (B) is toluene diisocyanate (TDI), diphenylmethane-4,4'-diisocyanate,

diphenylmethane-2,4'-diisocyanate, hexamethylene diisocyanate, bis(4-isocyanatocyclohexyl)methane, isophorone diisocyanate, or a derivative thereof obtained by oligomerization.

4. (Cancelled)

5. (Previously Presented) A urethane-based paint whose active component is the resin composition according to Claim 1.

6. (Previously Presented) A fluorine-based paint whose active component is the resin composition according to Claim 1.

7. (Previously Presented) A urethane-based adhesive whose active component is the resin composition according to Claim 1.

8. (Previously Presented) A urethane foam whose active component is the resin composition according to Claim 1.

9. (Previously Presented) An elastomer whose active component is the resin composition according to Claim 1.

10. (Cancelled)

11. (New) The resin composition according to Claim 1, consisting essentially of the polyol (A), the polyisocyanate (B) and the silane coupling agent containing an imidazole group (C).

12. (New) The resin composition according to Claim 11, consisting of the polyol (A), the polyisocyanate (B) and the silane coupling agent containing an imidazole group (C).

13. (New) The resin composition according to Claim 1, wherein the silane coupling agent containing an imidazole group (C) is obtained by the reaction of an imidazole compound and 3-methacryloxypropyltrimethoxysilane.
